

## QA Software Test - Job Description

### About us

Coderus is an established, innovative software development and consultancy business primarily focusing on mobile and embedded applications for the consumer market. Our rapid growth in the last few years means we are regularly on the lookout for suitable recruits to join our QA test team. The majority of our developments have been in the consumer device sector, but we are currently diversifying our client base and need to recruit testers with the right aptitude and ability to support our new projects.

### The role

You will be responsible for QA testing software projects as part of the overall test team, reporting to the lead test manager. You will need to have a disciplined approach and demonstrate excellent organisational skills in planning, documenting, and keeping to agreed schedules. The role covers the design of test cases with the support of and consultation with the QA test and software development teams as well as execution of manual functional through to automated tests, reporting defects and preparing reports.

Familiarity with software development and management methodologies would be helpful. You will be trained in the use of the software management systems used by Coderus, and Agile development as required.

This is a great opportunity to join a progressive, technology led team directly involved in the development of exciting commercial software products for existing clients, new clients and our own internal projects.

### Education

Ideally a 2:2 classification degree or better in Computer Science or related computing degree subject. We will also consider candidates with a lesser qualification, some relevant experience, aptitude and enthusiasm. Relevant QA/test analyst qualifications are also advantageous (e.g. ISEB/ISTQB)

### Skills and responsibilities

- A natural curiosity
- A good understanding of the software development process
- A good understanding of the business process
- Good judgment and diagnostic skills
- Good writing skills (for documenting, bug recording and final report preparation)
- The ability to work well in a team and as an individual
- The ability to work under pressure and to tight deadlines
- Providing or supporting client issue resolution
- Adhering to a project's schedule and raising any concerns in meeting deadlines promptly
- Ability and willingness to work unsupervised

**SMART CODE SOLUTIONS**

Coderus Ltd is a company incorporated in UK. Registered Office: Ross Building, Adastral Park, Martlesham, IP5 3RE, UK. Reg. No. 3532269 VAT No. GB 711 3283 72

Page 1 of 3

- Have good communications skills, consultancy skills and an excellent grasp of the English language
- The ability to handle and configure client consumer devices, development boards and reference designs used for testing
- Being focused and determined to produce only the very best results
- Occasional working hours flexibility in order to meet crucial deadlines

#### **Desirable skills and responsibilities**

- Familiarity with designing and running automated tests
- Evaluating and increasing a test program's effectiveness
- An enthusiasm to learn new ways to develop test programs, develop new skills and knowledge
- Working with clients to support diagnostic and issue resolution
- Administering the test server
- Working knowledge of iOS, Android & Windows Phone / Tablet devices
- Basic home network knowledge for both wired and wireless setups
- Good working knowledge of Mac OS X & Windows platforms

#### **Company culture and identity**

Founded by MD, Mark Thomas in the late 90's, Mark has a passion and dedication for delivering only the very best solutions. There is an expectation that everyone works to the highest standards in order to achieve the best possible client satisfaction. Our main development focus is mobile and embedded applications for the consumer market, but also the use of these software skills to support smart and IoT (Internet of Things) device developments and similar products for a variety of market sectors. In order to deliver a complete client package, we also develop supporting desktop applications, server applications and provide firmware consultancy. Coderus uses the latest development tools and technologies, and industry standard software management systems and delivery techniques. For more information, see our website - [www.coderus.com](http://www.coderus.com)

#### **Location and travel**

All positions are located within our 'Innovation Martlesham' offices on the BT Adastral Park campus, east of Ipswich where there are excellent facilities (shops, restaurant, car park and various recreational facilities) and a natural open environment well suited to modern hi-tech businesses, see the website - [www.innovationmartlesham.com](http://www.innovationmartlesham.com)

There are good road connections and regular buses between the campus and Ipswich and Woodbridge. There is also a regular shuttle bus between the campus and Ipswich railway station for staff and visitor use.

### Remuneration and benefits

An attractive and negotiable starting salary is available depending on skills, ability and experience, plus the usual company benefits including web based training and mentoring. Starting leave allowance is 28 days p.a. increasing annually. The working week is 40hrs.

There are excellent and convenient facilities locally in Ipswich and Woodbridge are short distance away, providing a wide variety of accommodation and entertainment. London is also within easy reach.
