

Mobile Development Internship - Job Description

SHARE OUR PASSION FOR TECH AND MAKE AN IMPACT

Looking for a fulfilling tech career? Think Coderus. Part of the Innovation Martlesham high-tech cluster of companies, we offer a startup culture in which to really grow your career. As part of an enthusiastic team, you'll be directly involved in the development of commercial software products for our clients, including a high-end international media company, and also our own innovative projects.

About us

Coderus is an established, innovative software development and consultancy business primarily focusing on pioneering embedded development and mobile applications for consumers. Our rapid growth and diversification into new vertical markets mean that we need to find talented recruits with ideas and the ability to develop our increasing portfolio of software projects and applications.

The role

At Coderus, you will join a small team of enthusiastic developers and testers and be directly involved in some aspect of our commercial software developments. This may be a special project, a software component, automated test development or functional testing depending on your skills, capabilities and our delivery schedule. This will give you the opportunity to experience working in a dynamic team delivering high quality software in a commercial environment. Applicants will need to be well organised in order to manage software development in a controlled and structured way. Handling and configuring client consumer devices, development boards and reference designs will be necessary. (Training will be given).

On completion of the internship you will have made an important contribution to the development of our leading commercial software products, gained a useful insight into the commercial software development process, and made a positive contribution to the knowledge and growth of an SME in the tech sector.

Education

You will be working towards a degree (second year) or Masters in Computer Science, Web technology, software engineering or other relevant degree subject with the expectation of achieving at least a 2:1 classification.

Desirable skills

- Experience with IOS or Android development, but experience with any software development such as embedded, server, desktop or web development, or automated testing would be beneficial.

SMART CODE SOLUTIONS

Location

Coderus is located within the Adastral Park campus, home to over 100 high-tech companies. Based east of Ipswich, Adastral Park offers excellent facilities (shops, a restaurant/deli, free car parking, gym on site, and various recreational facilities) and a green open environment in which to relax during lunch and break time. To learn more, [visit the Innovation Martlesham website](#).

Getting here

There are good road connections and regular buses between the campus and Ipswich and Woodbridge. There is also a regular shuttle bus between the campus and Ipswich railway station for staff and visitor use.

Both Ipswich and Woodbridge offer excellent and convenient facilities and are situated just a short distance away. Ipswich Waterfront, which is only a short distance away from Adastral Park, provides a wide variety of accommodation and entertainment. London is also within easy reach, with regular, direct connections to Liverpool Street station just over an hour away.

Remuneration, hours and benefits

The working week is 40 hours (Monday to Friday 9am – 6pm) with an attractive and negotiable starting salary, plus benefits depending on skills and ability is available.

The Internship duration will be up to 18 weeks.

Benefits include a wide variety of sport facilities, free gym membership, haircuts, daily fruit, both hot and cold drinks, and many more. We also pay for our employees to attend seminars and workshops, to further their professional development.

The team holds monthly pizza and gaming nights, and everyone is invited to other social events e.g. bowling and go-karting.
