Software Testers (As and when required basis)

We are seeking to recruit enthusiastic and motivated team players to join our expanding team of software developers and testers to work as part of a test group.

Candidates will complete manual test runs on a range of mobile applications. They will follow tests specified in our 'test case management tool' and raise any issues they find to the test lead or the test engineers.

This will provide candidates the opportunity to experience working in a dynamic team delivering high quality software in a commercial environment. Applicants will need to be well organised and have good communication skills.

We are seeking competent users of smart mobile phones and tablets running either or both iOS (e.g. Apple iPhone and iPad) and Android (e.g. Pixel, Samsung, Sony & Huawei). An interest in 'app' design and development including mobile games design is desirable but not essential.

Candidates will make an important contribution to the development of our leading commercial software products, gain a useful insight into day-to-day business operations and make a positive contribution to the growth of this business.

Coderus is an established, innovative software design and development business primarily focusing on applications for consumer devices. Founded by Mark Thomas, CEO, his passion and dedication for delivering only the very best solutions has resulted in a steady growth provided by a diverse range of clients. For more information visit our website www.coderus.com.

All positions are located within our 'Innovation Martlesham' offices on the BT Adastral Park campus, east of Ipswich where there are excellent facilities, including good public transport services and an environment well suited to modern hi-tech businesses. For more information about Adastral Park and Innovation Martlesham visit the website www.innovationmartlesham.com.

Salary will be based on the National Minimum wage.

Please apply by providing your CV with a covering letter to careers@coderus.com or use the 'contact us' form on the website careers page www.coderus.com/careers.
